EDUCATION

PORA ACADEMY <i>Software Development (Mobile App)</i>	Aug 2024 - Mar 2025
The ICT University <i>BSc, Software Engineering</i>	Oct 2020 - Feb 2024
Government Bilingual High School Yaoundé <i>High School Diploma</i>	Sep 2019 - Sep 2020

EXPERIENCE

Vmedia | *Full-Stack Developer* **Apr 2026 - Present**

- Architected a multi-tenant synchronization platform for GoHighLevel agencies, propagating custom fields, tags, products, and calendars across 7,000+ sub-locations, with a SHA-256-based snapshot versioning system that cut GoHighLevel API calls by ~90%.
- Integrated Clio, HubSpot, and Airtable into the same backend system alongside GoHighLevel and SmartAdvocate, implementing OAuth 2.0 authentication, persistent ID mapping, and webhook signature verification for secure, structurally-resilient data sync.
- Built a Vue.js frontend and production-grade backend infrastructure — including a real-time sync diff viewer and audit history, plus structured logging, observability metrics, and idempotent error recovery.

Cameroon International Tech Summit CITS24 | *Front-end Developer* **Sep 2024 - Oct 2024**

Engaged in a National Hackathon, contributing to an innovative challenge.

- Utilized Next.js and web development best practices to create a platform connecting individuals and enterprises with eco-friendly product vendors.

Full Gospel Mission | *Intern* **May 2024 - Aug 2024**

- Engineered efficient and scalable software solutions using Java and JavaScript, achieving a 30% increase in application performance and enhanced system reliability.
- Constructed responsive user interfaces with React and developed robust back-end functionalities with Node.js, integrating both SQL and NoSQL databases to streamline data management and API support.
- Collaborated closely with stakeholders to gather requirements and define project timelines, ensuring timely delivery of software solutions that aligned with business objectives.

ICC SOFT | *Software Developer Intern* **Mar 2023 - May 2023**

- Assisted in designing and implementing mobile applications for Android and iOS platforms using Flutter for the mobile application and JavaScript for the backend, contributing to the successful launch of two new apps.
- Tested software products and reported bugs to ensure high quality standards, leading to a 20% reduction in post-release issues.

PROJECTS

- **Agency Sync Hub**: A system to manage and automatically synchronize multiple GoHighLevel locations for an agency.
- **Promptopia** - Web application that allows users to share useful AI prompts with each other and save them.
- **Ai-Shorts** - A web application that generates short videos based off user prompts using AI models (Gemini, Replicate, AssemblyAI).
- **Transfer Ease** - A mobile application that facilitates seamless transfer of funds with DeFi using Flutter and a blockchain approach.
- **Memo-Clip** - A video reminder application built with Flutter.

- School Management System - A system built with ReactJS and Express to manage staff and student records.

SKILLS

- **Soft Skills:** Teamwork, Adaptability, Strong Collaboration Skills, Strong Written and Verbal Communication Skills
- **Technical Skills:** Full Stack Development, API Design & Integration, System Architecture
- **Programming Languages:** Java, Python, JavaScript, PHP, Dart, SQL, HTML/CSS
- **Frameworks & Libraries:** Laravel, Vue.js, React, Node.js, Flutter, Flask, WordPress, Material-UI, Shadcn-UI, Next.js
- **APIs & Integrations:** GoHighLevel API, Clio API, Airtable API, HubSpot API, OAuth 2.0, Webhooks, RESTful API Design
- **Tools & Technologies:** Git, Docker, Postman, VS Code, MySQL, MongoDB, Firebase, Supabase, Google Cloud Platform, PyCharm, IntelliJ, Eclipse

LANGUAGES

- English (Native), French (Native), Japanese (Intermediate), German (Elementary)

CERTIFICATES

- Certificate of completion for Flutter and Dart (Udemy)
- Certificate of completion for AWS Solutions Architect
